

Joey Christian Bautista

WEB DEVELOPER / SYSTEMS ADMINISTRATOR / IT SUPPORT

Zamboanga City, Philippines | yemonstaa@gmail.com
github.com/yemonstaa | yemonstaa.github.io/Portfolio

PROFILE

Junior developer and IT specialist with hands-on experience in business IT support, game-server infrastructure, and community automation. Builds practical desktop tools and helps maintain reliable server and client systems.

EXPERIENCE

Technical Support & Infrastructure Specialist

Jun 2026 - Present

EnderHost

- Troubleshoot server crashes, Java runtimes, JVM settings, and startup commands through client support tickets.
- Resolve plugin dependencies and version conflicts; assist with custom game-server configurations.

IT Troubleshooter

Sep 2025 - Present

Small Business & B2B Solutions

- Diagnose hardware, software, and network issues for internal staff and business clients.
- Deploy and configure client systems; perform maintenance, updates, and repairs to support daily operations.

SELECTED PROJECTS

Tillstead | Desktop point-of-sale system

Electron / React / TypeScript / SQLite

Offline register with cashier/admin roles, barcode scanning, held orders, cash and GCash checkout, inventory alerts, protected voids/refunds, reports, backups, and 58/80 mm ESC/POS receipts.

MFDungeons | Minecraft dungeon plugin

Java / Paper / MythicMobs

GUI-configured party dungeons in isolated worlds, with custom waves and bosses, progression triggers, timed BossBars, rewards, and automatic instance cleanup.

MineFront | Owner & Lead Administrator

Dedicated infrastructure / Pterodactyl / JVM

Configured and tuned Ryzen 9 9950X / 32 GB infrastructure for a multi-mode Minecraft network. Managed JVM settings, startup configuration, and server instances. Network in development.

DonkeyVerifier & DonkeyLogger | Discord automation

JavaScript / Discord.js

Built role verification with duplicate-role checks and private setup feedback, plus moderation logging for message, channel, role, and voice activity with audit-log attribution.

SKILLS

Development: HTML, CSS, JavaScript, Java, Git, GitHub, Minecraft plugins, Discord automation

Infrastructure: Linux, Windows Server, Pterodactyl, JVM tuning, network diagnostics

IT support: Hardware diagnostics, client deployment, ticket resolution, onboarding, SOPs

EDUCATION

BS in Information Technology

2024 - Present

Zamboanga City State Polytechnic University
