PROFILE

Junior Web Developer, Systems Administrator, and Technical Support Specialist with hands-on experience supporting business IT environments, dedicated game-server infrastructure, and Discord automation. Builds practical tools and maintains server and client systems.

EXPERIENCE

IT Troubleshooter - Small Business & B2B Solutions

Sep 2025 - Present

Provides internal and external technical support across IT systems and client hardware and software deployments.

- Diagnoses hardware, software, and network issues for staff and business clients.
- Configures specialized client hardware and software; performs maintenance, updates, and repairs.
- Responds to support requests to help minimize operational downtime.

EnderHost - Technical Support & Infrastructure Specialist

Jun 2026 - Present

Supports and maintains client game-server environments.

- Troubleshoots server crashes, ticketed issues, Java runtimes, JVM settings, and startup commands.
- Resolves plugin dependencies and version conflicts; assists with custom server configurations.
- Provides real-time technical support to clients.

SELECTED PROJECTS

Tillstead - Desktop POS - Offline-first Electron register with cashier/admin roles, barcode scanning, held orders, cash/GCash checkout, inventory alerts, protected voids/refunds, CSV, reports, backups, and ESC/POS receipts.

MFDungeons - Paper plugin for GUI-configured party dungeons, instance worlds, MythicMobs waves and bosses, progression triggers, timed BossBars, rewards, and cleanup.

MineFront - Owner and Lead Administrator. Provisioned and tuned dedicated Ryzen 9 9950X / 32 GB infrastructure for a multi-gamemode Minecraft network; configured JVM settings, startup scripts, and Pterodactyl management. Network in development.

DonkeyVerifier - Discord verification bot with one-click verified-role assignment, duplicate-role checks, and private setup errors.

DonkeyLogger - Discord moderation logger for message, channel, role, and voice activity, with audit-log lookups for supported administrative changes.

SKILLS

Systems: Pterodactyl Panel, Linux and Windows Server, dedicated infrastructure, JVM optimization, network diagnostics

Development: HTML, CSS, JavaScript, Java, Minecraft plugins, Discord automation, Git and GitHub

IT Support: B2B technical support, hardware diagnostics, client deployment, ticket resolution, onboarding and SOPs

EDUCATION

Bachelor of Science in Information Technology

Zamboanga City State Polytechnic University

2024 - Present
